A minimalist line drawing of a tree structure. The tree is composed of black lines on a white background. It features a central vertical trunk. A horizontal branch extends from the left side of the trunk, and another horizontal branch extends from the right side. The left branch has a diagonal line segment extending upwards and to the left. The right branch has a trapezoidal shape extending downwards and to the right. Two red circular lights are positioned on the tree: one on the left branch and one on the right branch.

The image shows a 4x4 grid of squares. A thick black line starts at the top edge of the first column, goes down to the first horizontal line, then diagonally up to the second horizontal line, then horizontally left to the second vertical line, then diagonally down to the third horizontal line, then horizontally right to the third vertical line, then diagonally up to the top edge of the fourth column. There are 7 red dots: one at the intersection of the second vertical and second horizontal lines, one at the intersection of the third vertical and first horizontal line, one at the intersection of the fourth vertical and second horizontal line, one at the intersection of the fourth vertical and third horizontal line, one at the intersection of the first vertical and fourth horizontal line, one at the intersection of the second vertical and fourth horizontal line, and one at the intersection of the fourth vertical and fourth horizontal line.
